- I loved this class. Before this experience if you gave me the option of public speaking or being eaten by bears, I would have had www.bringinthebears.com pulled up immediately! But what I've learned in the past 1.5 days will certainly keep the bears away. Thank you for such honest and helpful feedback – I feel prepared to practice what I've learned and hope to knock my next presentation out of the park.
- One of the best classes I've ever taken. Thank you!
- I feel like this was life changing and I don't state that lightly. I feel like a new person and cannot wait to take my newly learned skills to the real world.
- Thanks for making this fun and pretty laid back. You took a stressful process in presenting and made it fun with jokes, great advice, and made feedback constructive.
- Superb opportunity to learn skills to improve my presentation delivery - WOW!!
- Great expertise and delivery in this space. Excellent coaching and detailed, practical tips that showed improvements on the spot!
- This course is invaluable. If I were king for a day, I'd make the full course a requirement for every leader in the company.
- I personally came to class scared to death. Feeling as if I'm intimidating to others, especially when giving a presentation from the front of a group. Understanding that there is a certain way to deliver a presentation in a way that can become powerful and informative at the same time, I thought it was out of my reach. This training has helped me bring out some of my natural abilities to help me feel confident and deliver that information timely and precise.
